

AAK-ML (Mortise Lock Body Sold Separately)

AAK-L

AAK (Handle only)

Choose the Alfred Ambassador Kit (AAK) To Suit Your Project.

## ALFRED AMBASSADOR PROGRAM

The Alfred Ambassador Program has been developed and curated to mitigate the immense, unavoidable liabilities of having premium, finished door hardware installed and in use during the construction phase of a project. Designed leveraging decades of industry experience and knowledge, Alfred Ambassador kits provide smart, innovative and simple options for a broad range of applications. The innovative custom-engineered T-Grip temporary handles offer: a near tool-free assembly and installation (DIY Friendly); compatibility with all standard cylindrical lock preps and most North American mortise lock applications; tapered rose design allowing for worry and tape free painting of doors; and are recyclable and easily reusable for multiple projects providing an unmatched value proposition. Complimented by value-focussed options for securing your openings (pre-keyed temporary mechanical deadbolts and mortise cylinders), the Alfred Ambassador Program is the first dedicated suite of solutions that finally protect your finished hardware from being exposed to the inevitable abuse, damage and significant frustrations and costs of readjustment, replacement and revisiting of openings for property owners, builders and installation teams alike. Protect your investment and time while impressing final occupants with finished doors and hardware in pristine condition.

Smart, Temporary, Re-Usable... Keep Your Premium Hardware Beautiful
